PRESENTATION OF THE DESIGNER

Mark Collett, founder of M.A.Aston, is a designer who draws his inspiration from everyday objects, nature and any other curve that moves his mind. With a strong sustainable development ethic, Mark uses steam bending, an ancestral, energy-saving know-how that he manipulates with emotion to create iconic, timeless and universal pieces.

2021: French Craft Collective, London

2022: Exhibition at the Moulin du Got Museum

2022: Prix création des Ateliers d'Art de France, Nouvelle Aquitaine

2022: B2B Métiers d'Art meetings with the Middle East

2023: Salon Révélation, Paris

COMPANY PRESENTATION

M.A.Aston is a young company that has succeeded in highlighting the heritage of an ancestral technique. The company's DNA is reflected in pure, timeless designs with a prestigious allure.

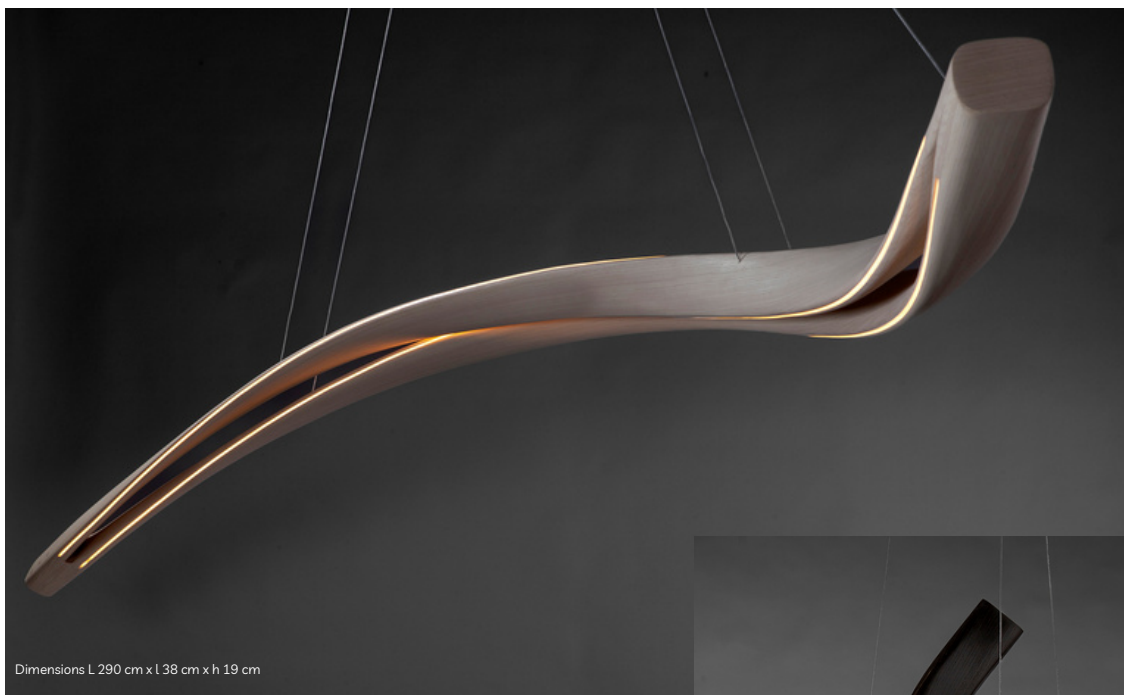

The design of each piece is carefully thought out and, in most cases, in collaboration with the customer, so as to obtain a unique result adapted to each environment.

Today, M.A.Aston works internationally with renowned interior designers, private companies and individuals.

DESIGNS

Mark makes precise choices when it comes to raw materials, with ash being the most commonly used wood species. He carries out the entire manufacturing process in his workshop, where each stage requires meticulous, precise, rigorous handwork.

NEW DESIGNS

These two new works have been specially created for Revelations 2023. One in its natural state, with pure, bewitching lines. The other has a satin black finish to amplify the contrast. Both feature state-of-the-art LED strips and a silicone profile for a perfectly minimalist finish.

THEY TRUST US

The company works closely with its customers

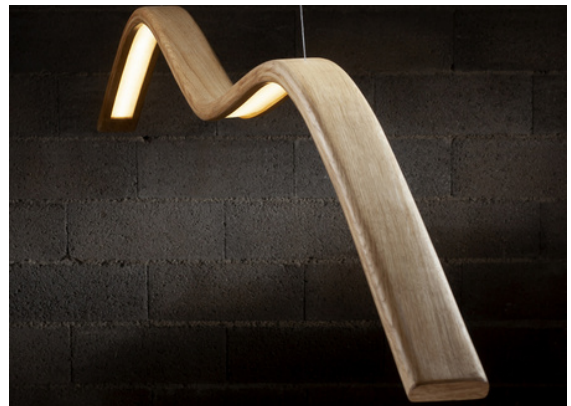

Reda Amalou
founder and partner at AW2

Dimensions 220 cm x l 90 cm x h 50 cm

Vendôme édition
Interior design agency

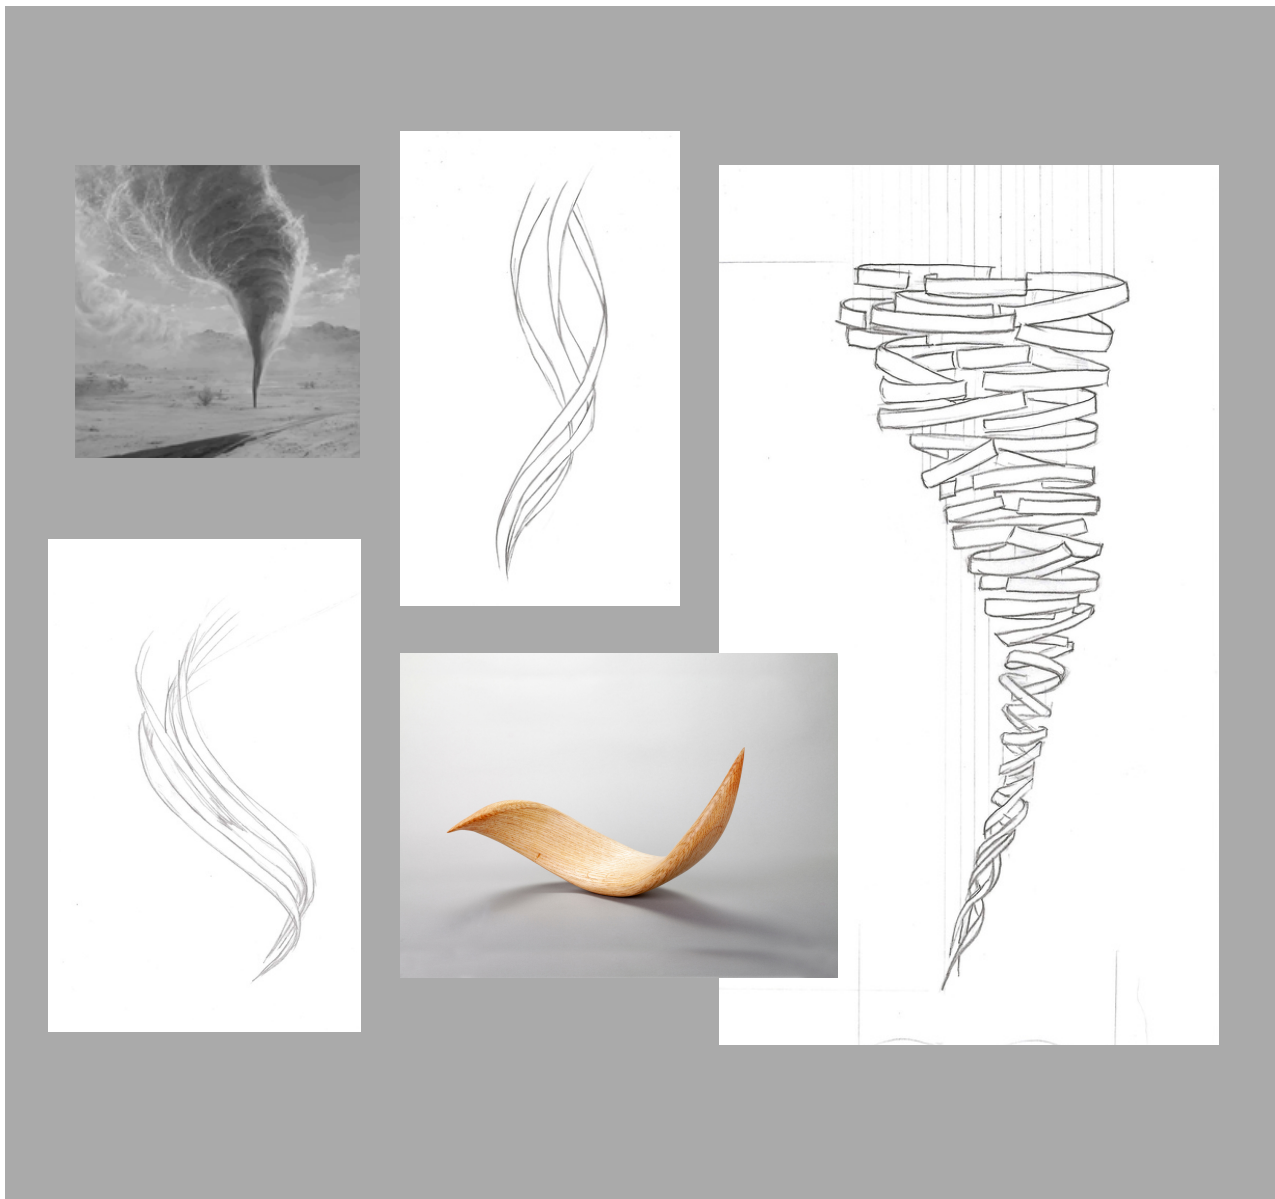

Dimensions L 250 cm x l 8 cm x h 30 cm

Private residence
Forêt de Rambouillet

Dimensions L 300 cm x l 200 cm x h 100 cm

PROJECT

Inspired by a cyclone, this work would be elaborated as a unique installation. Indeed, if this project becomes reality, it won't leave us indifferent, as its powerful stature will take us to a height of 10 meters. A unique creation with a colossal span of 3 meters.
